

SOLIDARITY WITH HONDURAN PEOPLE

The Communist Party of El Salvador, the Work Party of Guatemala and the Communist Party of Honduras all gathered in El Salvador, after analyzing the social and political crisis which Honduras is facing, we state our profound solidarity to honduran people's struggle against Juan Orlando Hernández's corrupt, fraudulent, and authoritarian military regime.

Ten years from the Coup d'état supported by United States (US) and the Organization of American States (OAS) that overthrown the lawful democratically-elected president Manuel Zelaya, the neoliberal extractivist economic model has been consolidated while US government involvement, political crisis, systemic campaign of imprisonment, harassment, repression and/or murder against the perceived opposition increase.

The social struggles and protests, as a result of this crisis, have received a front outrage not even hesitating on damaging universities' autonomy, murder and imprison many activist such as students, male and female workers, human rights defenders and so.

Therefore, our Parties strongly condemn Juan Orlando Hernández's regime and the brutal imperialist political interference in our countries. Furthermore, we want to appeal to international community, people of the world, Communist Parties and workers to solidarize with Honduran people, we encourage you to state firmly your discrepancy in regards of JOH's dictatorship and to demand to stop popular repression. Likewise, we motivate Honduran popular organizations to converge in a single popular front against JOH's dictatorship.
