

Note of PCPE about the recent developments in Venezuela

The Communist Party of the Peoples of Spain strongly condemns the movements made in the last days against the Venezuelan Government and the people, which continue and step up the attacks the country has suffered for decades and specially in the last years.

The self-proclamation of Juan Guaidó as president, his recognition by several foreign Governments, with the U.S. at the forefront, the unacknowledgement of President Maduro by the National Assembly, its statements demanding the soldiers to intervene, the uprising of some of them in Caracas or the appointment of a special representative in the Organization of American States (OAS) by the National Assembly are just some of the actions the political opposing groups, which are the majority in such organism, have made. Their aims are clear: They want to replace a government hostile to the interests they represent for a regime that will comply with them and that pretends to plunder the many natural, human and economic resources found in Venezuela. It is one more offensive of imperialism which, even though it has not ended up – yet – in war, like in Syria or Libya, it does pose the same goals than in these cases.

The PCPE understands the solution to the problems of the Venezuelan people is no other than defending themselves by moving forward in the path of revolution which opposes the interests of the majority to the interests of those who want to wreak havoc to gain profits, by not allowing any obstacles nor brakes in that path. In this way, the Spanish communists will lend all their internationalist solidarity and support.

Long live the struggle of the Venezuelan people!

International Department of PCPE
